ARMAND NICOLET
TRAMELAN

WWW.ARMANDNICOLET.COM

The background of the image is a light beige color with a subtle, intricate pattern of interlocking gears and mechanical components. The gears are rendered in a light blue-grey line art style. In the lower-left quadrant, the word "SWISS" is written in a large, stylized, serif font, with the letters "S", "W", and "I" being significantly larger than "S", "S", and "S". The text is also in a light blue-grey color, matching the gear pattern.

CONTEMPORARY COLLECTION

AL3 MOON PHASE

Quartz movement with Moon Phase functions. Calibre Ronda 708.
Guilloché decorated dial with Mother Of Pearl, set with #6 diamonds
brilliant cut, quality VS-SI, colour grade F-G, total 0.06 carats.

Technical Specifications:

- Case and Buckle: Stainless Steel
- Water Resistance: 5 ATM
- Diameter: 38.5 mm
- Thickness: 11 mm

Versions:

- Stainless Steel 316L, guilloché and MOP dial set with #6 diamonds
- Stainless Steel 316L set with #12 diamonds, guilloché and MOP dial set with #6 diamonds
- Stainless Steel 316L set with #68 diamonds, guilloché and MOP dial set with #6 diamonds

Straps available:

- 18 mm calf strap (alligator pattern) with stainless steel deployment buckle.

L16 MOVEMENT

The L16 collection features Original Historical Movement (O.H.M) FHF 264 from 1953. Mechanical movement, manual winding with Hours, Minutes & Small Seconds functions.

Underneath the balance wheel the movement is finished with "Perlage" while the bridges are decorated with "Côtes de Genève" and gold engravings. Armand Nicolet's expert watchmakers integrated it with the shock absorber and made many other modifications so that this masterpiece could achieve modern technical standards. Technical

characteristics: flat Hair-Spring, Lever escapement, 17 jewels, 36 hour power reserve and 18,000 vibrations per hour.

Calibre AN0731S, obtained from FHF 264 produced in 1953 and modified in 2017.

Strap Available:

- Grey or Black big scales Alligator with Stainless Steel 316L Tang Buckle

L15 MOVEMENT

The L15 features O.H.M. (Original Historical Movement) Calibre AN0703A, obtained from UT 600 produced in 1967 and modified in 2014. Mechanical automatic movement.

The movement has been integrated with a shock absorbent system. The upgrade makes this movement a perfect mix of great Swiss mechanical tradition with the most modern techniques of watch-making. The ticking produced by 21,600 vibrations per hour creates a magic and charming sound that is typical of traditional mechanical timepieces. The 25 jewel calibre has been finely decorated with "Cote de Genève" finishing and embellished by "Perlage".

Technical characteristics: flat Hair-Spring, Swiss "ancré" escapement, 25 jewels and 21,600 vibrations per hour.
